

RV Brooks McCall PowerPoint Bullets
Operational (Sampling) Period: 6/25/2010
Reporting Period: 6/26/2010

- The Brooks McCall completed 5 CTD casts today.
- The CTD array data showed fluorescence signals at Stations BM107, BM108 and BM109. No fluorescence signals were observed at Stations BM110 and BM111.
- The Brooks McCall reported the subsurface plume to be relatively well identified and is confined primarily to the west and estimated to be 3 km in width and at least 5 km in length.
- Rototox tests were started today (6/25/2010) for samples BM107-BM111 with results due to be reported on 6/26/2010. Rototox tests for BM103-BM106 were completed today and results have been submitted.
